Web copy for B2B VoiceXML SaaS business.

Cash flowing keeps your business going.

Unfortunately not all customers make their payments on time.

Sending invoices by mail is slow. Some customers can't or won't make payments online. Call center collections can be expensive and takes resources away from the rest of your business.

That's why we created **Pay It By Phone™**, to give your customers a more convenient way to pay that won't get in your way.

When customers have payment options that are easy and convenient for them, they will make things easier for you by paying what they owe and paying it on-time more often. **Pay It By Phone™** is our software as a service solution that makes it simple for you to accept payments by telephone – no call center required.

How Fast Can I Start?

Pay It By Phone™

is ready when you are!

Give us a call today and we can get you started:

877-307-7177 x1

We're experts in voice applications and infrastructure.
